PHYS-SEC AGORA - NIGERIA

DELEGATE OVERVIEW

AGORA NEXUS

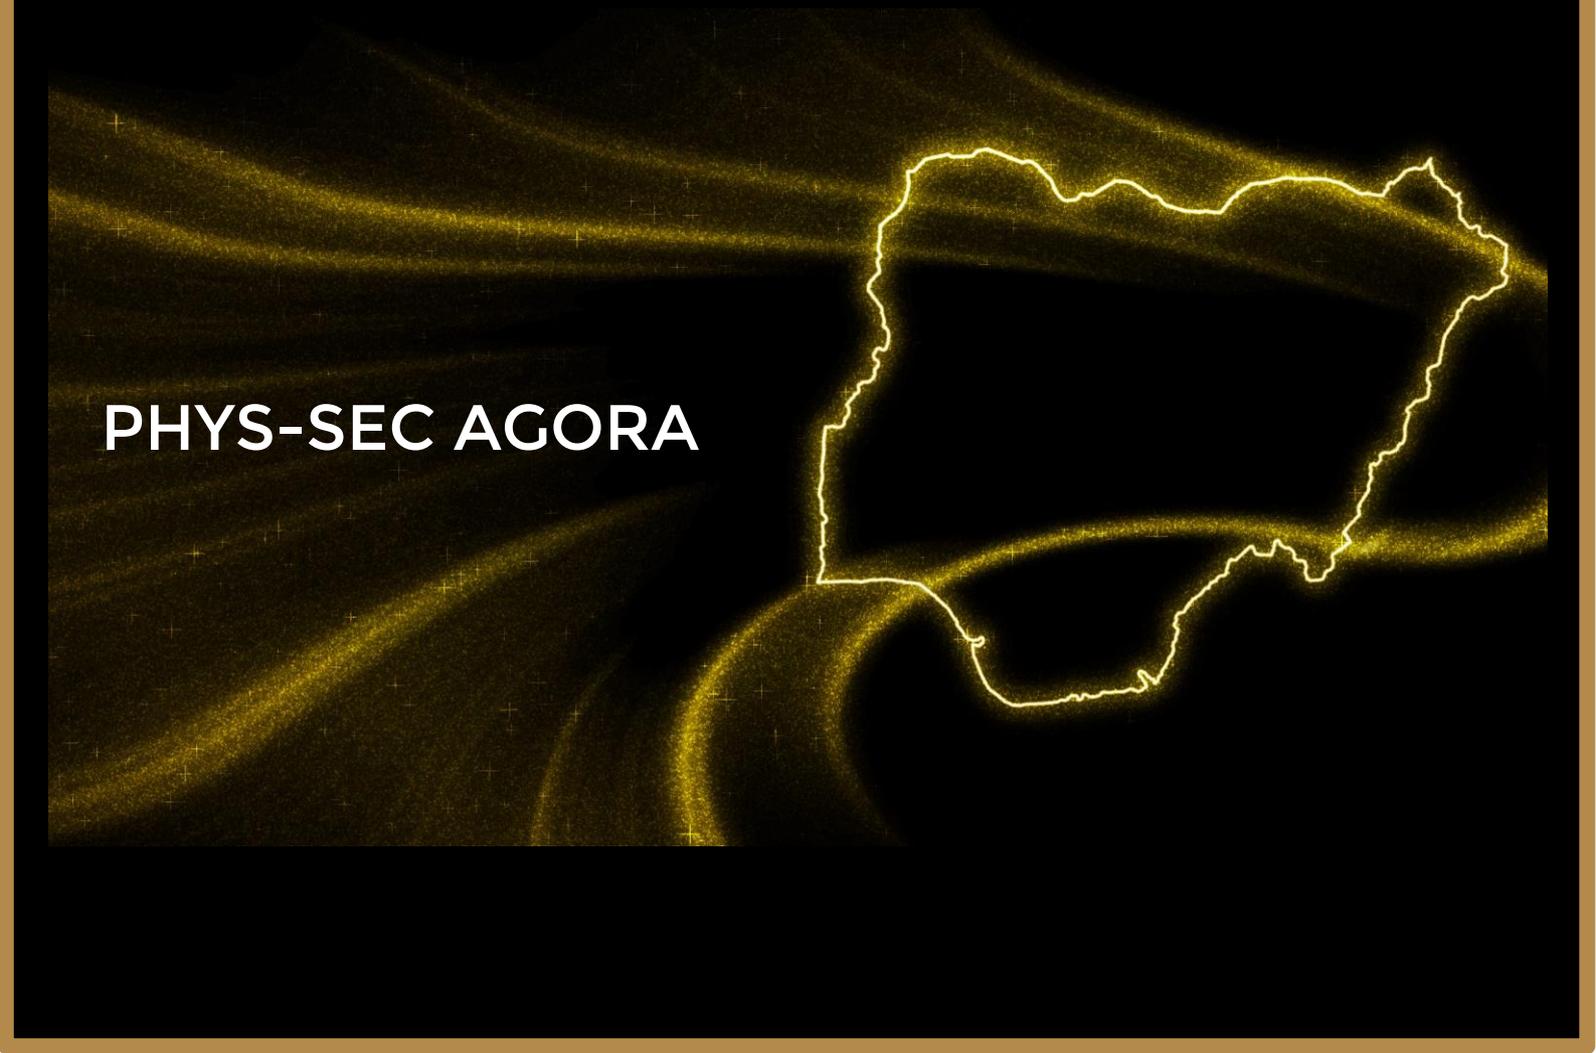

WHAT IS THE PHYS-SEC AGORA INITIATIVE?

The PHYS-SEC AGORA initiative aims to bring together security heads and other key actors from cross vertical sectors to address collectively the physical security issues and operational challenges that burden their respective industries through costs, disruption, and political and social instability.

Through exchange of knowledge, experiences and best security practice in a closed-door environment, the various vantage points will assist to provide educational perspective on existing current affairs.

The objective of the Agora is not just to create 'another industry event' but more so an ongoing group and community throughout the year to tackle issues, whilst reducing the disconnect amongst the various senior players across industries.

In addition to serving as a problem-solving forum for our multi-industry representatives, the PHYS-SEC AGORA initiative will also incorporate carefully selected vendor offerings for consideration as potential tools in those solutions.

The background of the lower half of the page is a dark, textured field of golden-yellow light. It features several horizontal, wavy bands of light that create a sense of depth and movement. On the right side, there is a prominent, irregular, jagged shape that resembles a lightning bolt or a stylized map outline, glowing with a bright yellow light. The overall aesthetic is futuristic and high-tech.

PHYS-SEC AGORA

HOW THE AGORA AGENDA AND PROGRAMME IS BUILT?

Each participant consults on an initial call with Agora representatives to discuss his or her role and responsibilities in supply chain security

Starting with those conversations, we develop discussions identifying critical issues, their root causes and modalities, and possible measures to resolve or mitigate them

On the basis of those discussions, we map key challenges and potential solutions, and then construct the Agora agenda around both regional and global issues

What is the Agora format?

- Chatham House Rule: unrecorded, unreferenced, pre-qualified participants, no media allowed
- To maximize collaborative problem-solving, in each session a use case study will be followed by interactive discussion and debate
- Key takeaways from the sessions will be collated and distributed for use as reference points and benchmarks going forward
- We have additionally incorporated an abbreviated Virtual Agora via MS Teams (as detailed on following page)

- When in-person gatherings are feasible, the agenda will consist of five or six 45-minute interactive sessions per day and include welcome and mid-morning coffee breaks, a networking lunch, and post-event drinks in the early evening

Current suggested topics?

- Armed Robbery
- Cross-border security challenges
- Kidnap for ransom, resilience, and incident response

- Journey management
- Access Control
- Perimeter protection
- Intelligent security solutions
- Asset Protection and Loss Prevention

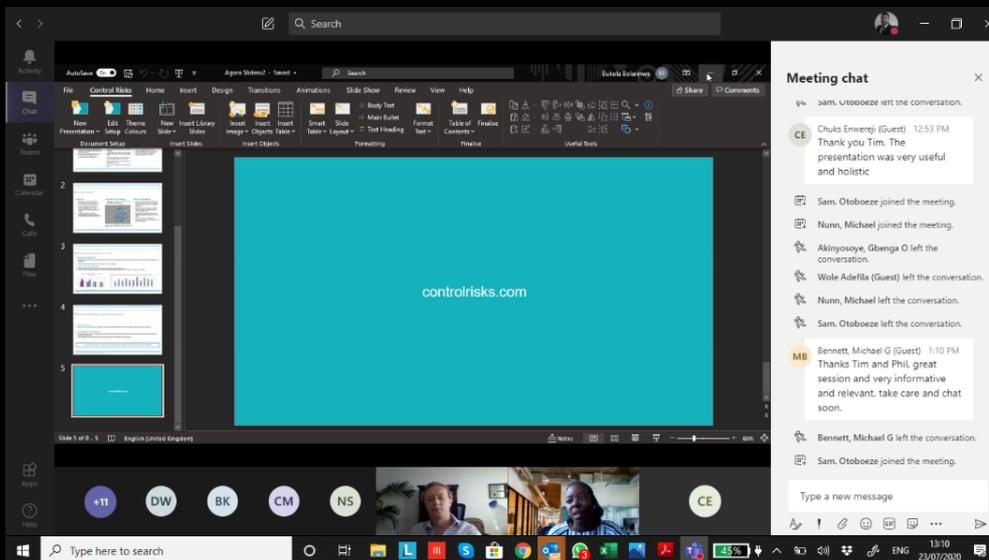

- Insurance and assurance
- Political and social unrest
- Community collaboration

VA VIRTUAL AGORA

How does the Virtual Agora work?

- Amid the global pandemic, we have adopted an abbreviated Virtual Agora.
- In-person Agoras will be supported by more frequent gatherings on MS Teams.
- The Agora remains focused on supporting a collaborative network of security professionals and leaders.
- The Virtual Agora maintains Chatham House rules (see above).
- Each Virtual Agora session follows the programme of either a standalone or panel presentation, followed by discussion and debate.

THE AGORA NEXUS COMMUNITY - WHO SHOULD ATTEND?

Job Titles

- COOs
- CXOs
- CSOs
- Heads of Security
- Security Managers
- Government Agency Officials

Industries – Including but not limited to:

- Financial Services
- Healthcare
- Telecommunication
- Manufacturing
- Food & Beverage
- FCMB

- Energy

What is the venue?

For in-person gatherings, given the sensitivity of the security sector and the seniority of the attendees, the location is only released to Agora programme participants.

The venue is always a five-star location, chosen with due consideration to security and convenience.

TESTIMONIALS - From our Oil & Energy Agora

Jean-Marc Ricca - MD West Africa, BASF

"I like the format very much and the ability to connect with people and companies I would not necessarily meet. Of course, it is difficult to build a content which would be 100% relevant but the topics essentially delivered on my expectation. I also like the concept of building communities. Some topics are strategic in nature and we need to bring forces together to address them"

Joko Olanitori - Asset Security Advisor, Shell Nigeria

"The Speakers demonstrated in-depth knowledge and experience on the topics presented at the different sessions. There were rich and purposeful discussion that could be progressed as solution to some of issues highlighted. The two days session afforded me the opportunity to learn, focus, discuss and share useful information with colleagues to better improve security in Nigeria and African in general.

Nelson Wilbert - Group Operations Director, Nigeria Schlumberger

"This was another successful, informative and networking platform for security managers and beyond. I am particularly pleased with the mix of new solutions interlaced with deeper-dives on shared challenges. I look forward to the next event!"

Richard Emuovhe - Security Advisor, Ocean Deep Drilling ESV Nigeria Limited (ODENL)

"The sessions which were spread out over two days were well thought out and presentations by resource persons comprised new knowledge on the different topics. There was much to learn from the case studies and applicability."

TESTIMONIALS - From our Oil & Energy Agora

Emmanuel Anyanwu - Security Advisor,
Midwestern Oil & Gas

"The kidnap presentation was my biggest catch and has further deepened my knowledge of kidnap management Social Engineering and community engagement as a strategic tool for reducing pipeline incidences in the Niger Delta, was beneficial and had further broaden my perception to seeing a better way fo dealing with CSR for asset protection. Due to this, I am going to make sure my Head of Services, Head Community Affairs and Head, External Affairs attend the next meeting."

Olajide Ishola, COO, Pan Ocean Oil Corporation

"Very Educative, opportunity for Interaction with other security professionals"

Widi Liman - Senior Security Advisor, Forte Oil

"It was a nice experience and I was also able to expand my network as well as gain a lot of things that can greatly add value to my professional career in the industry. The programme is apt and time in view of the myriad of security challenges affecting the Oil and Gas sector in Nigeria. Discussions was fantastic and at the end of the day, workable short, medium and long term solutions that are aimed at mitigating and or minimising these challenges were arrived at."

Ekponisi Ekponisie - Head of Security, CAMAC

"It was a really great outing and the discussions were great. Our problems are unique but we can learn from case studies outside the country and other successful solutions.

You did a great job Phil, first outing and there was so much to learn and great networking opportunity. Thanks"
